SKILLER SGK3 WHITE

With its bright white looks, the SKILLER SGK3 White will have you equipped for all challenges, thanks to its quick-response Kailh switches. The layout is deliberately compact but, at the same time, comprehensive. Therefore, whether the keyboard is being used for gaming or for complex work applications, no compromises will have to be made. Although the white finish of the surface is itself an eye-catcher, this also brings out the RGB lighting to its full. In addition, the downloadable software provides any required fine-tuning.

Features

REACTIVE KAILH SWITCHES
So that the SKILLER SGK3 White feels as if it's made just for you, whatever your needs, there is a choice of the most popular switches from Kailh. The red switches are aimed at gamers thanks to their linear characteristic without clicking noises or any tactile bump. Frequent typists and occasional gamers will particularly enjoy the tactile blue or brown switches. With a required operating force of 50 grams, all three types of switches actuate just as quickly after just 1.9 mm.

KAILH RED: LINEAR AND WITHOUT FEEDBACK
Thanks to a linear switch behavior without clicking noises or tactile resistance, you can concentrate fully on the challenge at hand with the red Kailh switches. With a required operating force of 50 g, the switches have an actuation point of only 1.9 mm.

KAILH BROWN: TACTILE BUT NOT CLICKY
Thanks to tactile switching characteristics without clicking noises, the brown Kailh switches are just as suitable for working in the office as they are for the occasional gaming session at home. With a required operating force of 50 g, the switches have an actuation point of only 1.9 mm.

KAILH BLUE: TACTILE WITH PERCEPTIBLE CLICK
Thanks to a tactile switching characteristic with a clear click, the blue Kailh switches can create a typewriter euphoria for those who just love typing. With a required operating force of 50 g, the switches have an actuation point of only 1.9 mm.

COLORFUL REFLECTIONS
Thanks to extensive illumination options, either with or without the use of the downloadable gaming software, the SKILLER SGK3 White can be given a very personal touch from a wide variety of lighting effects.

DURABLE PBT KEYCAP SET
With the included keycap set, the most frequently used keys can be simply highlighted for even better use. Thanks to the double-injection technology and the use of high quality PBT, the keycaps are particularly durable and robust and do not obscure the lighting.

STURDY DESIGN WITH 3-BLOCK LAYOUT
In order to fully meet all requirements, from gaming to sophisticated office work, the SKILLER SGK3 has a fully comprehensive 3-block layout.

FULL CUSTOMIZATION WITH THE GAMING SOFTWARE
Most of the keyboard's functions can be used as soon as it is connected for immediate enjoyment and good resource management. However, to get the most out of your SKILLER SGK3 White, you can also use the downloadable gaming software. This allows you to reassign the keys, record and save macros and provides further customization for the keyboard illumination.

Specifications

Product Name	SKILLER SGK3 White
