

1337

V2

GAMING MOUSE MAT

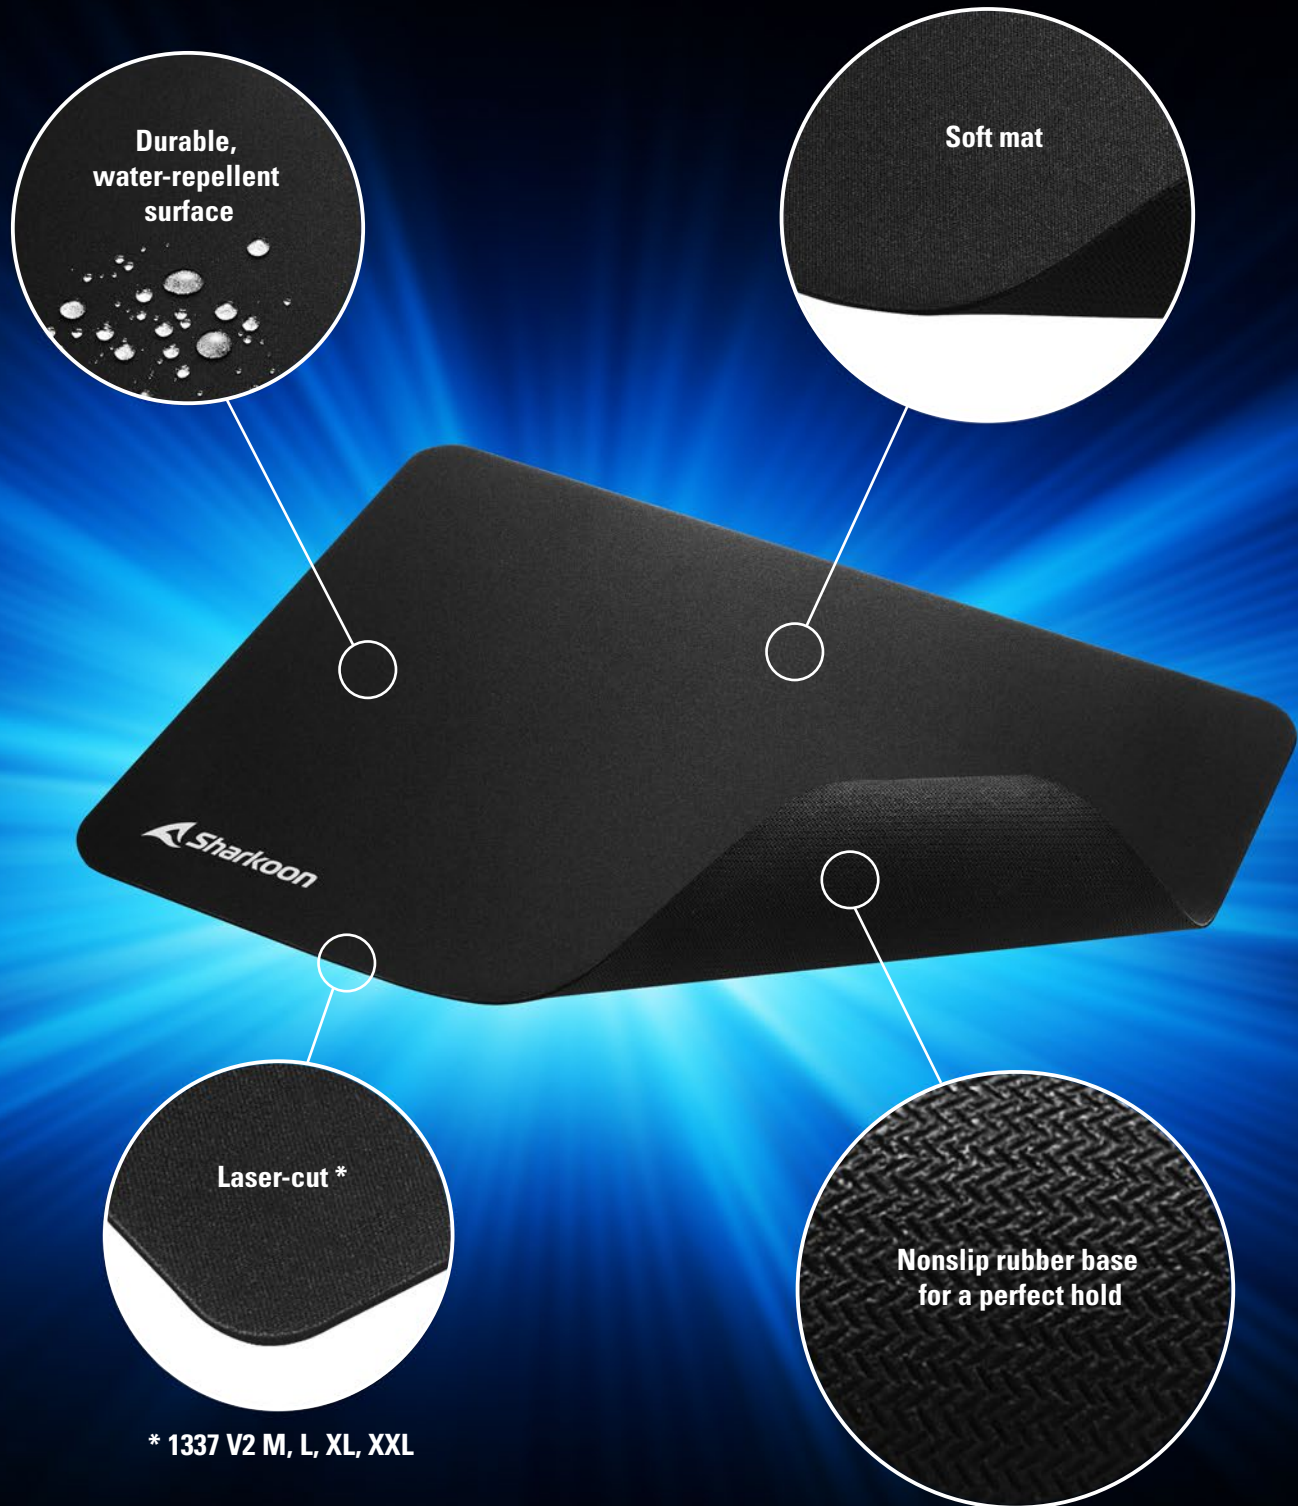

FEATURES

- Water-repellent surface
- Laser-cut edges
- Nonslip rubber base

Soft
mat

Top Features

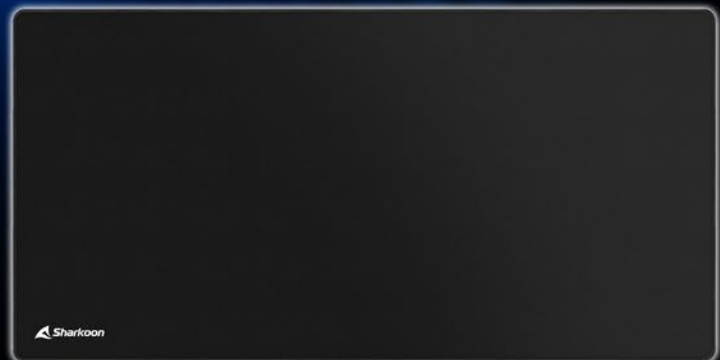

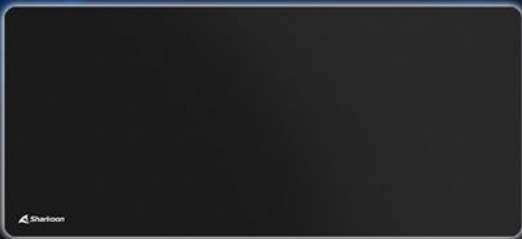

With the 1337 V2, we've made our most popular mouse mat even better. We've furnished the textile surface with a water repellent coating, and, in addition, all the edges have been precisely laser cut, thus preventing any unsightly fraying around the mat. Like all the gaming mouse mats in the 1337 series, the V2 also has a completely nonslip rubber underside and a textile surface for optimal sliding properties for all types of sensor.

A Solid Foundation for All Purposes

SIZE BIG Dimensions (L x W x H):
1,200 x 600 x 2.5 mm

SIZE XXL Dimensions (L x W x H):
900 x 400 x 2.4 mm

SIZE XL Dimensions (L x W x H):
444 x 355 x 2.4 mm

SIZE L Dimensions (L x W x H):
355 x 255 x 1.4 mm

SIZE M Dimensions (L x W x H):
280 x 195 x 1.4 mm

The 1337 V2 gaming mouse mat is available in the sizes M, L, XL, XXL and Big. The size M has a length of 280 millimeters and a width of 195 millimeters, being especially made for use with mobile devices such as notebooks and tablets. The size L, with a length of 355 millimeters and a width of 255 millimeters, will even fit on top of smaller tabletops. The XL, with its length of 444 millimeters and width of 355 millimeters, will offer enough space for maneuvers which have to be executed in the frenzy of the game. Anyone who wants to cover nearly all of their gaming tabletop with an excellent sliding surface can go for the XXL variant with its gigantic 900 millimeters length and 400 millimeters width. The "Big" version, on the other hand, is for all those who really like it big. With its whopping 1200 x 600 millimeters, the mat is exactly as its name says: Big. The mats have a thickness of 1.4 millimeters for the M and L versions, and 2.4 millimeters for XL and XXL, while the "Big" version is 2.5 millimeters thick. The mouse mats are therefore conveniently slim as well as being robust.

Smooth Gaming and Working

The 1337 V2 keeps to a proven and reliable textile surface, which is not only robust and durable but also offers minimal drag and negligible start resistance. The mouse mat thus provides exceptional sliding no matter which mouse sensor type is being used. The underside is made of stable rubber, preventing the mouse mat from inadvertently slipping while gaming or while working.

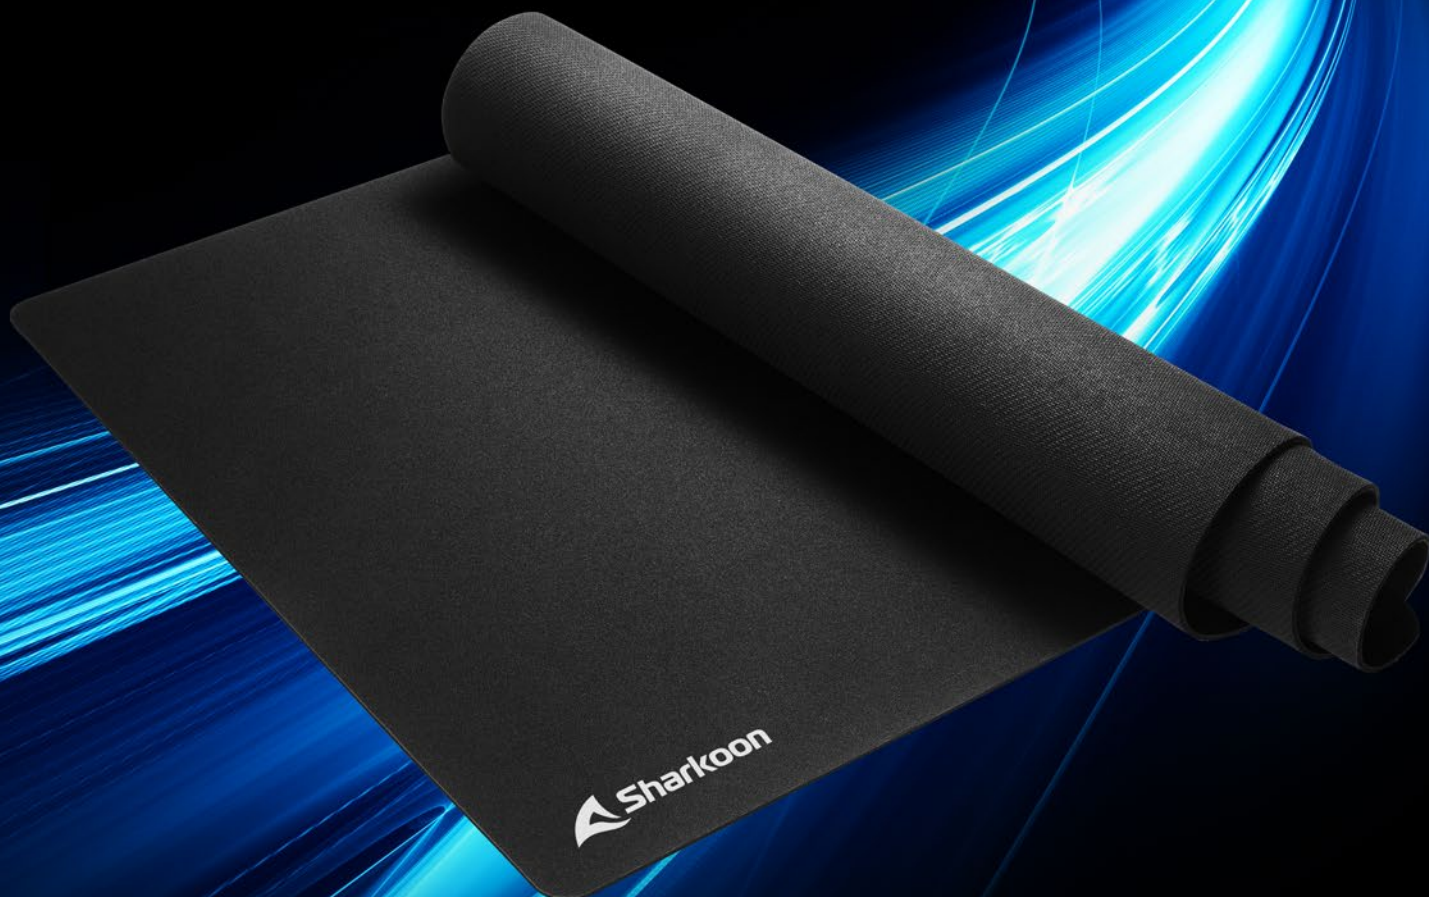

Tidy Edges with No Fraying

The edges of the 1337 V2 M, L, XL and XXL have been cut with absolute precision by laser. This effectively avoids fraying around the mouse mat and maintains its neat appearance even after a long period of use. The edges of the 1337 V2 Big are stitched, so that even the largest mouse mat of the series has a neat and tidy outline.

Optimally Made for Transporting

Thanks to its flexible materials, the 1337 V2 can be simply rolled up whenever required. The mouse mat can thus be conveniently stored and accompany its owner to LAN parties, eSport events or while working outside of the office.

Well Protected and Easy to Clean

In addition to its optimal sliding properties, the textile surface has a water-repellent coating, preventing damage caused by drinks spilled during hectic gaming or by other small accidents with fluids. Moreover, the 1337 V2 can be simply freed of dust and dirt under running water.
